

Need a connection to Hydro-Québec's power grid?

Start the process **as soon as possible** because this type of request involves several steps.

To obtain the electrical connection at the right time, make sure you **contact a master electrician quickly** and have them submit your request to Hydro-Québec. Lead times for Hydro-Québec to carry out work will be calculated from the date the request is submitted.

Plan ahead by starting the process as soon as possible.

Consult the current average lead times:

- Residential customers: www.hydroquebec.com/residential/connection-lead-times
- Business customers: www.hydroquebec.com/business/connection-lead-times

Longer lead times should be expected in the following cases:

- The premises to be connected are located more than 30 metres from Hydro-Québec's grid.
- The premises to be connected are located in an area not currently served by the Hydro-Québec grid.
