# Specific Terms and Conditions of Îles-de-la-Madeleine

The following section sets out the specific terms and conditions that apply to residents of Îles-de-la-Madeleine. The provisions of the *Participant's guide* apply if they don't contradict the following terms and conditions.

## Installation of solar panels

### Bonus financing

- The amount of financial assistance is \$2,000 per installed kW and can cover up to 50% of the purchase and installation costs of the solar panels.

### Ineligibility

- Installation of solar panels in a home whose main heating system is fuel-fired is not eligible for financial assistance

## Energy Star® certified heat pumps for cold climates

### Bonus financing

- The amount of financial assistance is \$200 per 1,000 BTU/h for Energy Star® certified heat pumps for cold climates.

### Ineligibility

- Installation of a heat pump that replaces or is in addition to a home's main fuel-fired heating system is not eligible for financial assistance.
- New buildings are not eligible. A building is considered new for a period of five (5) years following the completion of its construction.

### Reminder

- Any detached or accessory building located on the same lot as the main building and not permanently connected to the main building (such as a shed, garage, storage unit, greenhouse, etc.) is not eligible.

## Multiple measures

- The 5% bonus financing provided for in the LogisVert Efficient Homes Program for an application for multiple measures cannot be added to the financial assistance outlined above.
