

## Consultation notice Performance Review of IQ-N-001

November 2023

### Notice recipients

Entities listed in the Register of Entities Subject to Reliability Standards as Generator Operator (GOP)

**Consultation period:** November 20, to December 8, 2023.

### Purpose of the consultation

Since January 1, 2023, the [IQ-N-001](#) Voltage Schedule for Generator Operators (GOP) is effective and available on the [website](#) of the Québec Reliability Coordinator (the "Coordinator"). During the consultation phase on the voltage schedule, the Coordinator submitted that a performance review would be held at the end of the first year of the program implementation, in order to gather comments and learnings from the Registered Entities.

The Coordinator solicits comments of Registered Entities on the IQ-N-001 during the consultation period. Entities can send their comments by e-mail to [fiabilite@hydro.qc.ca](mailto:fiabilite@hydro.qc.ca).

In addition, the Coordinator will hold an information meeting on the subject on **December 6, 2023 from 13:00 to 14:00**. The purpose of this webinar is simply to allow the Registered Entities to communicate their comments verbally rather than by email.

To join this meeting, please [click here to join the meeting](#)

All relevant comments received will be used to improve the [Frequently Asked Questions for the voltage schedule](#).
